**Notes**

This course is essentially a senior elective seminar that will employ class discussion and secondary research to achieve the learning outcomes. In this sense, it will not be like most courses you've taken to date at the OSB; it will be more like the special courses that require travel and observation (normally scheduled during our Summer Term) except we will not be traveling physically, only in a virtual sense. In addition, the course will not have a widely used scheme since none exists, either in academia or in the industry, for identifying and analyzing future trends. We will be using a variation of the Delphi Method which employs informed opinion and consensus building as the basis for identifying future trends as the framework for the course.
