Business Administration

Course Title:

Credits: 3

Calendar Description: Management science is a discipline that aids decision-making by

applying a scientific approach to managerial problems. This course discusses quantitative methods and their extensive applications in business. Topics include linear programming, project scheduling, waiting line models, inventory management, simulation, Markov process, decision analysis, and forecasting. Use of computer software is an integral part of this course (also

offered by Distance Education).

Semester and Year:

Prerequisite(s): STAT 124 or 121 and minimum third-year standing

Corequisite(s): No

Prerequisite to: BUAD 491

Final Exam: Yes

Roger Wheeler	x4226	C119	rwheeler@okanagan.bc.ca

Upon completion of this course students will be able to

- explain the scientific approach of how to apply systematic methodologies in solving managerial problems that guide decision making.
- identify and apply appropriate techniques for managing business problems and correctly interpret the results of analysis through critical thinking.
